

You have problems with 3G coverage

Here comes the solution

the **MOBILE BROADBAND EXTENDER**

The infrastructure enables a user to

- 3G Broadband where you normally only have 2G
- Extends the distance between 3G base station and 3G user
- Easy to mount and deploy
- Self Alignment of the antenna
- Ensures maximum possible signal strength
- Offers wireless and wired communication
- Increases the speed at the border of 3G coverage
- Also available with LTE technology
