www.ht05.org Sixteenth ACM Conference on Hypertext and Hypermedia

Concepts, Methodologies and Tools for Supporting Knowledge Workers

6-9 September 2005; Salzburg, Austria

Hypertext 2005 invites scholars, researchers and practitioners from all disciplines to participate in this event and exchange ideas, theories and experiences regarding the use of hypermedia to augment the capabilities of knowledge workers.

Topics

In addition to interdisciplinary work describing the application of hypermedia concepts and technologies in other fields, Hypertext 2005 encourages submissions that address broad topics, especially concerning one or more of the following themes:

- > Hypermedia in Digital Libraries
- > Hypermedia in the Humanities
- > Hypermedia and Information Retrieval
- > Adaptive and Adaptable Hypermedia
- > Hypermedia Engineering
- > Literary Hypermedia
- > Ubiquitous and Physical Hypermedia
- > Spatial Hypermedia
- > Collaborative Hypermedia
- > Time and Synchronisation in Hypermedia
- > Hypermedia Systems and Structures
