

Salzburg Research and the Faculty of Digital and Analytical Sciences at the Paris Lodron University Salzburg are closely collaborating **on the intersection of energy systems and digitalization to accelerate the energy transition.**

To strengthen our interdisciplinary research team, we are looking (for 4 years) for a full-time

PostDoc (f|m|non-binary)

The position is by intention thematically open to allow for promising and upcoming research topics to be proposed (along the lines laid out above)

Your Responsibilities

- Carrying out independent research
- Publication of research results at scientific conferences and in journals
- Developing novel research approaches and methods
- Supporting the acquisition of third-party funding

Your Qualifications

- Completed doctorate in computer science or data science
- Know-How in communication and network technologies
- Experience in the field of energy networks is beneficial
- A track record in international cooperation and in the acquisition of third-party funding
- Can-do-attitude and willingness to shape an individual (and internationally visible) line of research combining energy systems and digitalization

The monthly salary is **EUR 4,752.30** gross for a **40-hour week** according to the FWF-model. The position is at the Paris Lodron University Salzburg. Please send your application, including a one-page sketch of your aspired line of research, with the identification **[PostDoc-EXDIGIT]** to: jobs@salzburgresearch.at

We look forward to hearing from you!
